DETAILED ACTION

Applicant's amendments filed 2/4/2010 have been entered. Claims 4, 10, 12-16, 34-42, and 57-58 are pending.

The outstanding rejection under 35 USC 112, first paragraph is withdrawn in view of the amendments filed 2/4/2010.

The outstanding double patenting rejection over the conflicting application 11/112,055 is withdrawn in view of the application is abandoned.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 12-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 12 is depending from a cancelled claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10, 12, 34, 38, 39, 41, and 42 are rejected under 35 U.S.C. 102(b) as being anticipated by Blum et al., reference of record.

Blum et al. teaches a silbene compound, AG1233, meeting the herein claimed limitations (See page 15708, Table D).

Claims 4, 10, 12-16, 34-39, 41, 42, 57, and 58 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,409,953 ('953).

'953 teaches combretastatin compounds with -OCH₃ or -OH in the herien recited position (See for example the abstract).

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 34-39, 41-42, and 57-58 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-2 of U.S. Patent No. 6,919,324 ('324). Although the conflicting claims are not identical, they are not patentably distinct from each other because '324 teaches a small genus of compounds that encompasses the prodrug of the herein claimed compounds (See especially claim 1). One of ordinary skill in the art would have been motivated to employ any of the '324 compounds, including the one recited herein, in order to use them to treat cancer.

Response to Arguments

Applicant's arguments and the declaration by Dr. Pinney with respect to the pending claims have been considered but are moot in view of the new ground(s) of rejection.

With regard to the teachings of Blum et al., AG1233 does not fall out of the scope of claims 10, 12, 34, 38, 39, 41, and 42 since the claims still recite the hydroxy moieties being attached to the ring structures.

Allowable Subject Matter

Claim 40 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
